web-based stormwater permitting

PermiTrack **MS4**

Looking for an easier way to track your NPDES stormwater permit? Get ahead and stay ahead with PermiTrack**MS4,** a completely web-based NPDES stormwater permit tracking system.

With yet another unfunded government mandate in place for mandatory and designated MS4's, finding a cost-effective and time-efficient way to administer your permit and prepare your annual report to be in compliance with NPDES stormwater permit regulations became imperative.

PermiTrack**MS4** is the solution. The days of labor-intensive, expensive and often frustrating efforts to assemble your annual report can be replaced with a system that lets subscribers access information and print a report with a few clicks of the mouse button—virtually from anywhere there is an Internet connection.

Consider it your online virtual file cabinet where you can store all of your goal and activity information pertaining to your permit. Agendas, memos, minutes, photos, graphics, and even CAD maps and GIS data can be attached and viewed by anyone to whom you provide access.

As the web-based home of your NPDES stormwater permit, this data is always secure. Drop your laptop in an outfall during an inspection? Not to worry. All saved data remains safely stored on our site.

Features and Benefits of PermiTrackMS4:

- Administer your permit anytime, in real-time

- Web-based technology— no investment in software or hardware needed

- Data is securely backed up online

- Regulated access anywhere there is an Internet connection

- Automatic alerts—manage your permit proactively with automatic e-mail alerting of permit-related goals and activities

- Quick status tracker—see what's done, and what needs to be done

- Annual report generator—your report at the press of a button

All these features and benefits mean you and your staff will save time and money while creating better results than ever before.

The PermiTrack**MS4** system will help you meet compliance dead-lines efficiently, on-time and with less cost each year. The solution couldn't be simpler—and we put it all right on your desktop, anywhere your desktop may be.

You also get the benefit of our expertise in NPDES stormwater permitting and report processes.

PermiTrack also includes:

- Import of your existing SWPPP

- Hands-on, on-site training for your staff

- On-call experts who will answer your permitting or technology questions
